

Circle each functional group and identify the functional groups by name.

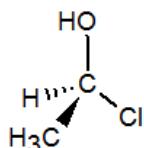

1.

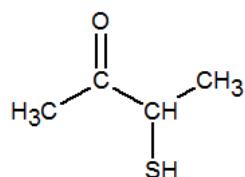

2.

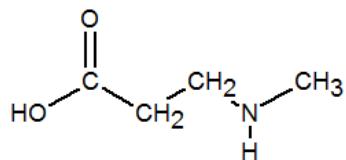

3.

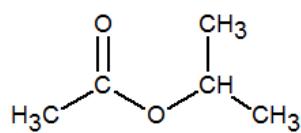

4.

5.

6.

7. Draw constitutional isomers for 2-methyl-2-butene

8. Draw two diastereomers for 1,2-dibromocyclobutane

9. Draw a constitutional isomer to propanoic acid ( $\text{CH}_3\text{CH}_2\text{COOH}$ ) that contain:

a. an ester

b. an ether and aldehyde

c. a cyclic structure

10. Draw structures for the following compounds. If the name is INCORRECT, fix that

a. 2,2,4-trimethylhexane

b. 4-isopropyloctane

c. 1-ethyl-5-methylcyclohexane

d. 2-propylpentane

e. butanone

f. cyclopentene

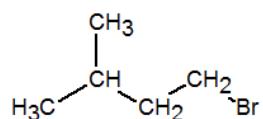

g. 3-ethylcyclopentanol

h. 4,4-dichloropentanoic acid

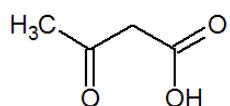

i. tert-butyl chloride

11. Name the following molecules using IUPAC rules

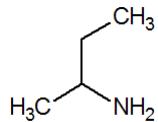

1.

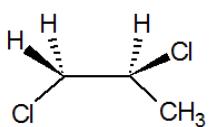

2.

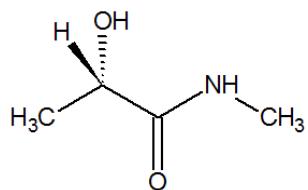

3.

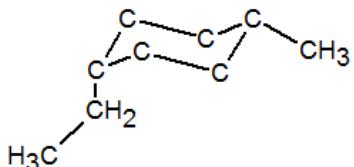

4.

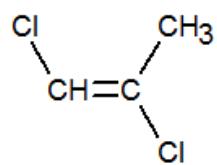

5.

6.

7.

8.
